# Madras® Satin and Textured

LINEAR PATTERNS

## MADRAS®: THE WIDEST RANGE OF SATIN GLASS WITH LINEAR PATTERNS FOR ARCHITECTURE AND DESIGN.

► **Madras® satin finishing and chemical etching**, unlike painting, permanently modify the surface of glass, but that's not all: they enable unique visual and tactile effects to be produced. Light is refracted and diffused with a rare delicacy thanks to the fineness of the texture. For the same reasons, cleaning is far easier too. And the beauty of the products lasts longer.

► **Different finishes for different degrees of vision**: to effectively block vision whilst allowing light to pass from one ambience to another, products with a satin-finish ground are to be preferred. In this case, the textures are very slightly in relief and pleasing to the touch.

Satin patterns on a transparent ground perfectly smooth on the surface, on the other hand, make it possible to look from one side of the glass to the other, while the double-sided versions create dynamic visual effects.

► **Drawing volumes with light**. Light diffused by a LED source embedded in the thickness of the glass enhances the Madras® finish. It's the satin-finish surface in fact that intercepts and reflects the light to become luminous itself.

Choice of colour is important here: to obtain maximum light transmittance it's preferable to use extra-clear glass.

► **Heat and mechanical transformations**. All Madras® products made of monolithic float glass can be tempered and laminated with PVB or EVA for safety applications. Certain models can also be produced using already certified laminated float.

► **Applications and installations**. Due to the ample choice of thicknesses and variety of finishes and performance characteristics, Madras® glass with linear patterns has been used by top interior designers for doors, partitions and quality furniture finishes, for both individual projects and serial production.

### TECHNICAL DESCRIPTION

Plate sizes\*: 2250 x 3210 mm (useful: 2210 x 3170 mm)

Thicknesses\*: 4/5/6/8/10 mm

Weight: 2.5 kg/m<sup>2</sup> per mm thickness

Colours:  clear  extra-clear  bronze  grey

\*Fluido: sizes 1610 x 3210 mm (useful: 1570 x 3170 mm), thicknesses 4/6 mm.
