Textured Linear #02

madras®

Italian made glass for Architecture and Design

MADRAS®: THE WIDEST RANGE OF SATIN GLASS WITH LINEAR PATTERNS FOR ARCHITECTURE AND DESIGN.

► **Madras® satin finishing and chemical etching**, unlike painting, permanently modify the surface of glass, but that's not all: they enable unique visual and tactile effects to be produced. Light is refracted and diffused with a rare delicacy thanks to the fineness of the texture. For the same reasons, cleaning is far easier too. And the beauty of the products lasts longer.

► **Different finishes for different degrees of vision**: to effectively block vision whilst allowing light to pass from one ambience to another, products with a satin-finish ground are to be preferred. In this case, the textures are very slightly in relief and pleasing to the touch.

On the other hand, transparent versions or satin patterns on a transparent ground, make it possible to look from one side of the glass to the other, while the double-sided versions create dynamic visual effects.

► **Drawing volumes with light**. Light diffused by a LED source embedded in the thickness of the glass enhances the Madras® finish. It's the satin-finish surface in fact that intercepts and reflects the light to become luminous itself.

Choice of colour is important here: to obtain maximum light transmittance it's preferable to use extra-clear glass.

► **Heat and mechanical transformations**. All Madras® products made of monolithic float glass can be tempered and laminated with PVB or EVA for safety applications. Certain models can also be produced using already certified laminated float.

► **Applications and installations**. Due to the ample choice of thicknesses and variety of finishes and performance characteristics, Madras® glass with linear patterns has been used by top interior designers for doors, partitions and quality furniture finishes, for both individual projects and serial production.

TECHNICAL DESCRIPTION

Plate sizes*: 2250/2400 x 3210 mm

Thicknesses: 4/5/6/8/10 mm

Weight: 2.5 kg/m² per mm thickness

Colours:  clear  extra-clear  bronze  grey

Availability of standard colours/thicknesses is subject to change. Please verify when ordering.

*Fluido: 1610 x 3210 mm / Plissé: 2000 x 3210 mm

TECHNICAL DATA SHEETS

We recommend checking the suitability of the chosen Madras® article by consulting the relative technical data sheet on our website: www.madrasglass.co.uk, Catalogue/All Products.

MILLERIGHE also Transparent version (TRSP)

TRIX

FLUIDO also satin-finished Velo (V) and Transparent (T)

PLISSÉ also satin-finished Maté (M) and Transparent (T)

STRIP

STRIP MATÉ also DOUBLE FACE

LINEA
