ALL THE MADRAS® PATTERNS INSPIRED BY THE WORLD OF FABRICS, FOR APPLICATIONS IN ARCHITECTURE AND DESIGN.

► Madras® satin finishing and chemical etching, unlike painting, permanently modify the surface of glass, but that's not all: they enable unique visual and tactile effects to be produced. Light is refracted and diffused with a rare delicacy thanks to the fineness of the texture.
For the same reasons, cleaning is far easier too. And the beauty of the products lasts longer.

► Different finishes for different degrees of vision: to effectively block vision whilst allowing light to pass from one ambience to another, products with a satin-finish ground are to be preferred. In this case, the textures are very slightly in relief and pleasing to the touch.
Satin patterns on a transparent ground perfectly smooth on the surface, on the other hand, make it possible to look from one side of the glass to the other, and attenuate the visual impact of the glass structure.

► Drawing volumes with light. Light diffused by a LED source embedded in the thickness of the glass enhances the Madras® finish. It's the satin-finish surface in fact that intercepts and reflects the light to become luminous itself.
Choice of colour is important here: to obtain maximum light transmittance it's preferable to use extra-clear glass.

► Heat and mechanical transformations. All Madras® products made of monolithic float glass can be tempered and laminated with PVB or EVA for safety applications. Certain models can also be produced using already certified laminated float.

► Applications and installations. Due to the ample choice of thicknesses and variety of finishes and performance characteristics, Madras® glass with patterns inspired by the world of fabrics has been used by top interior designers for finishing doors, sliding systems and other quality features, for both specific projects and industrial production.

TECHNICAL DESCRIPTION

Plate sizes: 2250/2400 x 3210 mm (useful: 2210/2360 x 3170 mm)
Thicknesses: 4/5/6/8/10 mm
Weight: 2,5 kg/m^2 per mm thickness

Colours: clear extra-clear bronze grey

Availability of standard items/colours/thicknesses is subject to change. Please verify when ordering.

TECHNICAL DATA SHEETS

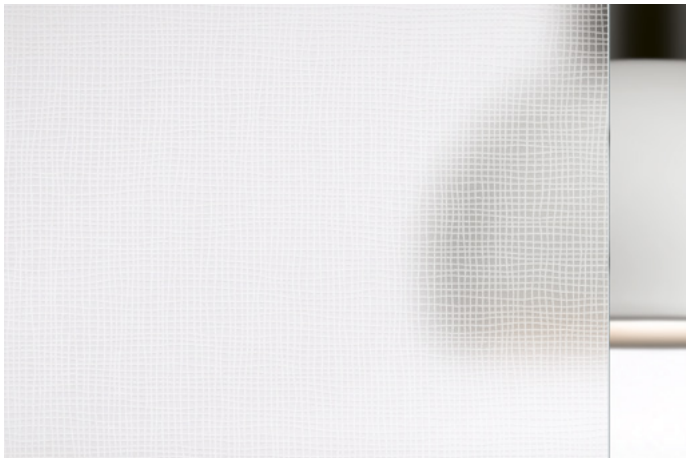

We recommend checking the suitability of the chosen Madras® article by consulting the relative technical data sheet on our website: www.madrasglass.co.uk, Catalogue/All Products.
